- #ST4070 Dual Security Ink Regular Stamp Pad Cartridge, 10 Pack (for ST4010, 4030)

Exclusive features of all new NYSE MSP equipment

Security Ink: All NYSE MSP Medallion Stamps and Replacement Ink Cartridges have a new proprietary machine readable security ink.

Once imprinted on a document, a compound within the ink will allow a Transfer Agent to scan and determine its authenticity.

Barcode: All Stamps will also have a barcode that will allow Transfer Agents to check the missing equipment database much more efficiently.
